

***The stand installation instruction is only used for reference when stand installation mode is applied for project.**

Floor Stand Installation Diagram

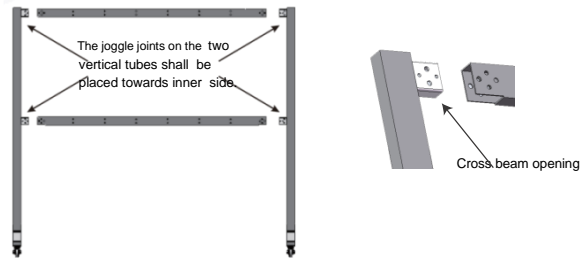

Installation steps:

Step 1: Assembly bracket

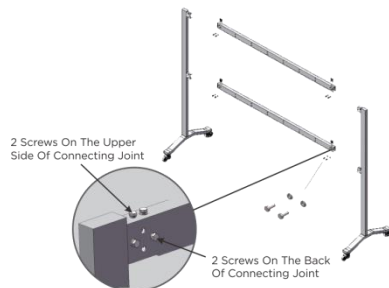

① Distinguish between front bracket foot and rear bracket foot, the side view of bracket feet is shown as below (the distance from the front bracket foot to the vertical tube is larger than that of the rear bracket foot):

② The installation of joggle joints on the two vertical tubes is shown as below:

③ Connect the joggle joint structures between two vertical brackets and cross beams, and then fix the joints with sixteen M8*20 hexagon screws and flat washers, as shown below:

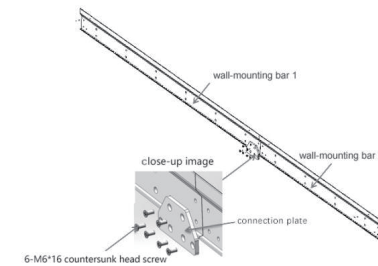

④ Tighten the mounting screws with the appropriate tools and the brackets are assembled, as shown below:

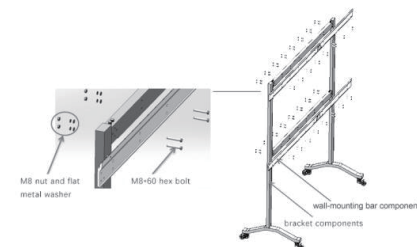

Step 2: Wall-mounting bar installation

① Match corresponding components for wall-mounting bar assembly, as shown below:

② Attach the wall-mounting bar to the bracket as shown below:

③ The wall-mounting bars and bracket are assembled, as shown below:
