Series One Desk 27

Meet the most **personal** member of the Series One family

The all-in-one Google Meet Series One Desk 27 is ideal as your personal video conferencing device in the office and at home, or for 1-2 person shared spaces and hot desking.

Premium video conferencing device

With a 5MP camera, 8 onboard mics and Google AI, the Desk 27 makes virtual meetings feel like you're in the same room. Just tap to meet.

Touchscreen desk monitor

Connect your laptop to the Desk 27 to extend your work space. Use the 27" touchscreen monitor to control your laptop applications.

Collaborative digital whiteboard

Whiteboard, brainstorm and ideate together with the passive stylus and integrated Jamboard app for anywhere, anytime collaboration.

Laptop docking station

A single USB-C cable connects the Desk 27 camera, microphones, speaker, power and control to your laptop.

Expand your calling network
Desk 27 is optimized for Google Meet, but you can use the conferencing app of your choice with a USB-C connection from your laptop.

Everything you can do in the meeting room, now on your desktop

Visually brilliant

27" QHD touchscreen
The vibrant Quad HD LCD screen delivers crystal clear visuals that let you see faces and content as if you were in the same room. Start meetings or whiteboard sessions with just a tap on the ultra-responsive touchscreen.

Collaboration complete
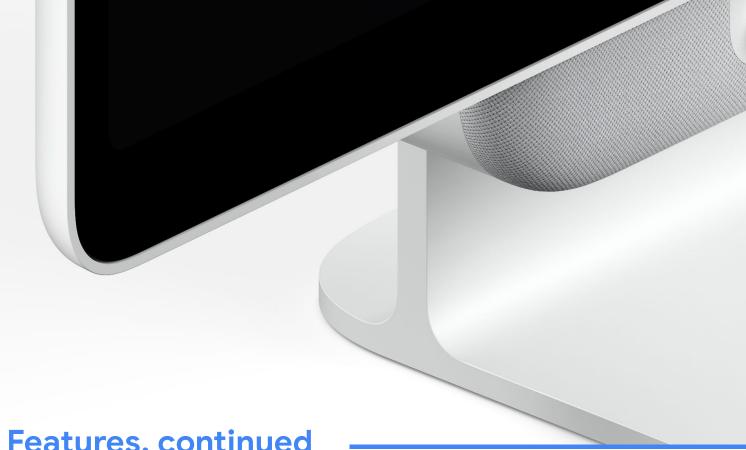

Passive stylus + magnetic dock
Keep ideas flowing from anywhere using the pixel-precise stylus that never needs charging or your fingers to sketch, annotate and whiteboard within the integrated Jamboard app.

Pixel perfection

5 MP camera
The 5 megapixel camera with ePTZ (electronic pan, tilt, zoom) frames meeting participants clearly and automatically using powerful Google AI.

Features, continued

Stunning sound

8 mics + stereo soundbar
Premium acoustic components and groundbreaking audio isolation technology eliminate distracting sounds while enhancing human voices.

Monitor and more

Docking mode
Connect via a single USB-C cable to use Desk 27 as a laptop dock and monitor. Power your laptop, run all your desktop apps, including video conferencing apps, and use Desk 27's premium camera, audio and touchscreen.

Integrated intelligence

Built-in Compute System
With both a Google Edge TPU (Tensor Processing Unit) and an Intel® Core™ i5 Processor, the compute system is made to handle constant AV workloads along with the latest Google AI efficiently and reliably.
